Jujo Thermal for POS

Jujo Thermal belongs to the world's leading direct thermal paper suppliers with its long-term specialization and commitment to developing and producing the highest quality thermal paper. The selection of JTK point-of-sales (POS) papers is developed to meet the requirements of today's and tomorrow's thermal paper use. Jujo Thermal papers are reliable and high-quality – they won't let anything fade.

Durable thermal paper for all cash register and point-of-sales use

JTK DURABLE PRODUCTS GUARANTEE

- excellent quality of thermal print image
- remarkable resistance and durability
- optimal runnability in converting and thermal printing processes
- safe solution for thermal print heads
- outstanding pre-printing properties
- safe solution also for the environment

PROPER RESISTANCE AND IMAGE STABILITY. Use of durable thermal paper is recommended in all cash register and POS applications. As receipts and documents may be handled casually - kept in a wallet, exposed to oil and grease, or be stored incorrectly - it is essential the paper has proper resistance and image stability qualities.

GUARANTEED TO LAST. JTK durable thermal papers guarantee a long-lasting thermal print image and offer an excellent resistance against different substances, such as heat, plasticizers, oil, fat and water. The JTK durable grades have a 10- or even 25-year image stability guarantee with correct storing conditions. In everyday life it means these grades have a remarkably better resistance against harmful substances and dure better various environments, compared to the standard 5-year grades.

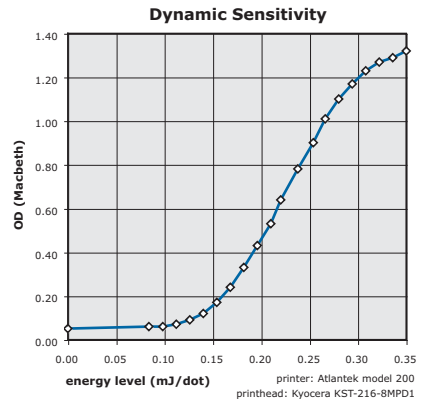

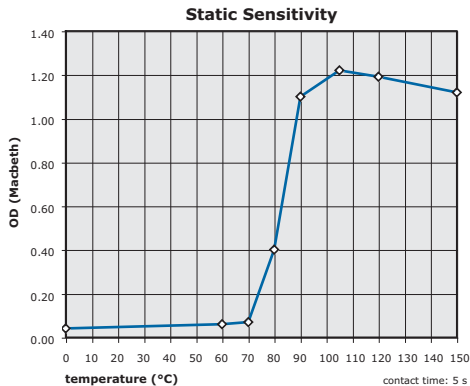

MAKING YOUR LIFE EASIER. All JTK durable grades are environmentally friendly and recyclable and aim at sustainable development. Switching from standard thermal paper to JTK Durable does not mean any extra burden. On the contrary - it makes life much easier!

JTK Extra Durable – superior quality

Durable thermal paper for extra demanding POS use. 2.5-year image stability guarantee with correct storing conditions.

AP50KJ-R™

- 55 g/m² – 63 microns
- superior image stability
