# Jujo Thermal for printer

Jujo Thermal belongs to the world's leading direct thermal paper suppliers with its long-term specialization and commitment to developing and producing the highest quality thermal paper. The result of concentrated development and the employment of high-class thermal paper technology is the new JTK printer range – a selection of products with specifically designed paper properties and outstanding printing performance.

# Jujo Thermal – optimal choice for thermal printing

## JUJOTHERMAL PRINTER GRADES GUARANTEE

- excellent quality of thermal print image – premium resolution and density!
- fast printing speed and high efficiency – even 300mm/s!
- remarkable resistance and durability
- always safe solution for thermal print heads
- outstanding pre-printing properties – design printouts!

**EXCELLENT QUALITY OF THERMAL PRINT IMAGE.** JujoThermal paper reaches the optimal dynamic sensitivity level, enabling a fast printing speed and an excellent printing result with premium resolution and density.

**DEVELOPED TO LAST.** The paper has a specifically developed resistance composition guaranteeing strong protection against different substances and a long-lasting thermal image – even in challenging circumstances.

**OUTSTANDING PRE-PRINTING PROPERTIES.** JTK paper has specifically developed surface properties enabling superior colours and sharp images for printing advertisements, logos and images on both sides.

**SAFE SOLUTION – ALSO FOR THE ENVIRONMENT.** After hundreds of kilometres of printed paper, Jujo Thermal is recognized as the safe solution for thermal print heads. In every process, Jujo Thermal paper has maximum running efficiency and minimum waste figures. JTK paper is recyclable.

**SUITABLE APPLICATIONS:** Jujo Thermal printer grades can be used in transportation and travel, car parking, lottery and gaming, entertainment, medical field, banking and many other printer applications.

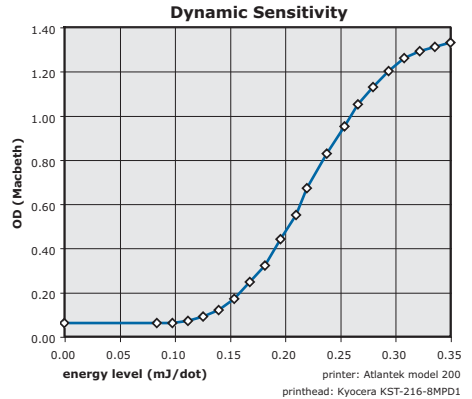

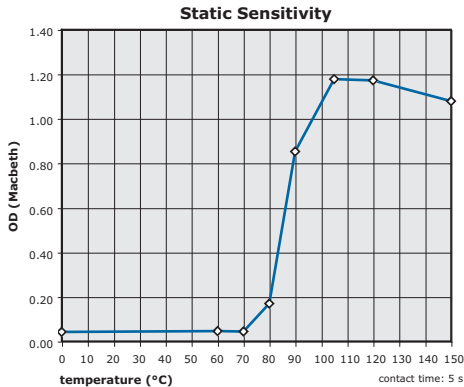

# JTK Extra Durable

Durable thermal paper for extra demanding printer use. 25-year image stability guarantee with correct storing conditions.

## AP62KJ-R™

- 75 g/m<sup>2</sup> – 83 microns
- printing speed up to 250mm/s (10"/s)
- superior image stability
- extremely high resistance against plasticizers, oil, fat and water
- archivable and stampable
- recommended applications: long-term archivable tickets and documents, value checks

Grammages up to 170 g/m<sup>2</sup> – thickness up to 193 microns

# JTK Durable

Durable thermal paper for demanding printer use. 10–12-year image stability guarantee with correct storing conditions.

## AL60KT-M™

- topcoated
- 72 g/m<sup>2</sup> – 79 microns
- high sensitivity
- printing speed up to 300mm/s (12"/s)
- superior image stability with 12-year guarantee
- superior barrier properties against plasticizers, oil, fat and solvents
- remarkable heat and UV resistance
- scratch proof
- recommended applications: lottery, gaming, travelling tickets, entrance tickets, other demanding printer use

## AL60KT-S™

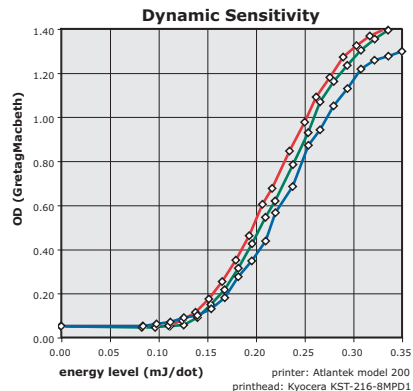

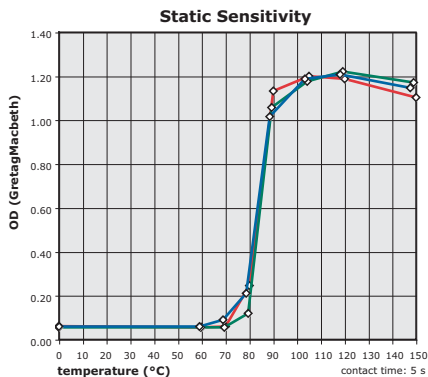

- topcoated
- 72 g/m<sup>2</sup> – 79 microns
- printing speed up to 250mm/s (10"/s)
- excellent image stability with 12-year guarantee
- excellent barrier properties against plasticizers, oil, fat and solvents
- remarkable heat and UV resistance
- scratch proof
- recommended applications: parking tickets, entrance tickets, bank statements, other demanding printer use

## AP62KS-FZ™

- 75 g/m<sup>2</sup> – 83 microns
- printing speed up to 250mm/s (10"/s)
- excellent image stability with 10-year guarantee
- very good resistance against heat, plasticizers, oil, fat and water
- recommended applications: transportation tickets, entrance tickets, value checks

Grammages up to 170 g/m<sup>2</sup> – thickness up to 193 microns

Also available: Reverse side coated and reverse side barrier coated thermal paper

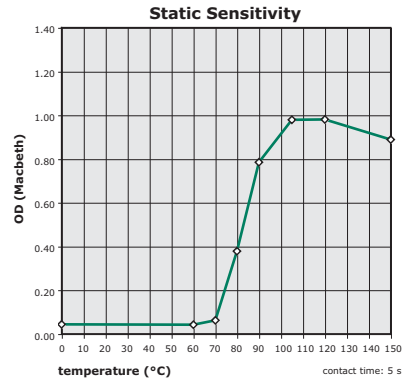

# JTK Standard

Standard thermal paper for printer use. 5-year image stability guarantee with correct storing conditions.

## AP62KM-A™

- 75 g/m<sup>2</sup> – 83 microns
- printing speed up to 300mm/s (11.8"/s)
- standard image stability
- high resolution
- good heat resistance
- recommended applications: parking tickets, entrance tickets

Grammages up to 170 g/m<sup>2</sup>  
– thickness up to 193 microns

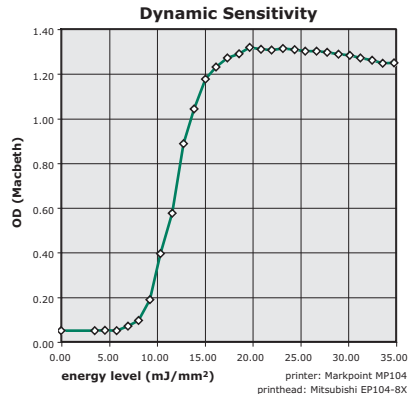

# JTK Special Products

## SECURITY PAPERS

JTK paper is also available with anti-counterfeiting features:

- special colour
- watermark
- unique Extrassure® safety texture
