

Our Non-Phenol Label Range

Jujo Thermal opens new horizons in the Non-Phenol thermal paper label range.

In response to market demands for alternative developer chemistries for non-phenol thermal papers, Jujo Thermal introduces a new range of non-topcoated and topcoated label grades.

As a pioneer in developing non-phenol based thermal coating chemistries, we consider it our obligation to react to customer needs of new formulating solutions in the pursuit of improved compatibility with environmental demands.

Consequently, our new KM-Z and KT-Z series enable the enhanced sustainability without any compromise on the stable thermal print imaging characteristics valued highly by our customers.

More attractive shelf appeal

The improved base sheet whiteness of the new ranges will be appreciated especially in label applications pre-printed for a captivating shelf appeal.

Product series

Non-topcoated.....	KM-Z series
Topcoated.....	KT-Z series

Contact the Jujo Sales Team for further information about our new Non-Phenol product offerings.
