

JUJO THERMAL KAUTTUA

# Nordic Paper Expertise

○ SUSTAINABLE PRODUCT INNOVATION

○ SPECIALTY PAPER EXPERTISE

○ EXCELLENT CUSTOMER SERVICE

**JTK<sup>®</sup>**

○ RESPECT FOR THE NATURE

Our specialty papers provide a solid foundation for various applications. Seamless co-operation between R&D, production and sales ensures we can be very agile in our customer service. With a paper making tradition of more than 100 years and the R&D support from our parent company Nippon Paper Group, we are well equipped to meet the most demanding needs and lead the way to future innovations.

## Direct thermal papers

A full range of durable thermal papers

Jujo Thermal is one of the world's leading suppliers of direct thermal papers for numerous applications: label face material, tickets & tags and point of sale use. Thermal paper technology is widely appreciated because it is highly economical, reliable and convenient. Our thermal papers perform excellently in thermal printers and in the laminating and converting processes.

We offer a complete range of thermal papers, including paper grades with image preservability of 25 years

**THERMAL LABELS** non-topcoated and topcoated thermal face papers for logistics, pharmaceutical, retail, linerless and specialty label applications

**THERMAL TICKETS & TAGS** Non-topcoated and topcoated thermal papers for bank, entrance, lottery & gaming, parking and transportation tickets and self-service kiosks

**THERMAL POS** Standard, durable and extra durable point of sale papers for ATM, cash register, coupon and guarantee receipts

**BPA

# We take pride in our service and quality.

In fact, we have successfully co-operated with several regular customers since the beginning of our company.

## Why choose our papers

- Global sales & customer service network
- Technical customer support
- Environmental policy exceeds the national and EU standards

## C1S papers

Advanced coated one side papers for label use

Coated one side papers with one or two coating layers, applied only on one side of the base paper, to achieve the optimal performance for the intended application. Important characteristics include properties such as gloss, brightness, opacity and printability.

## Barrier paper for flexible packaging

Recyclable and biodegradable SHIELDPLUS®

SHIELDPLUS® is an environmentally friendly flexible packaging paper with superior barrier properties against oxygen, water vapour and aroma penetration. Thanks to its wood fibre base and water-based barrier coating, SHIELDPLUS® is recyclable. Biodegradable grades are available on request. SHIELDPLUS® is our solution for packages to replace barrier films made of plastic or aluminium.

FLEXIBLE PACKAGING

Jujo Thermal Ltd., established in 1992, is one of the world's leading suppliers of direct thermal and coated one side papers. The production and R&D are located in Kauttua, Finland. Our papermaking heritage, however, reaches back more than 100 years. The foundation of our company is based on knowing the market requirements, continuous innovation to meet and exceed the customer expectations and, of course, hard work. With its 200 employees, the company makes a turn over of about 100 million euros. The extensive sales network takes care of global customer service. Known for its consistent product quality, innovation and excellent service, Jujo Thermal is accredited by the ISO 9001, ISO 14001 and ISO 45001:2018 certificates, and holds the FSC and PEFC chain of custody licenses. Jujo Thermal is a member of the Nippon Paper Group.
